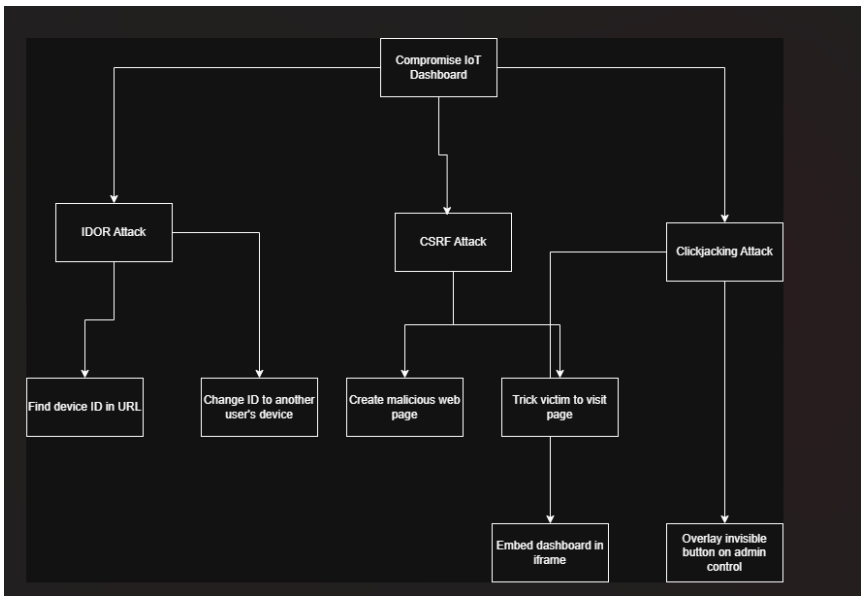
ATTACK TREE:



STRIDE TABLE:

Threat Type	Description	Affected Component	Mitigation
Spoofing	Fake user login, device impersonation	Flask App, IoT Device	Strong authentication (JWT, secure sessions)
Tampering	Modified requests, SQL injection	Flask App, Database	Input validation, parameterized queries
Repudiation	No logging of user actions	Flask App	Logging, monitoring, audit trails
Information Disclosure	Exposure of sensitive data	API, Database	HTTPS, encryption, secure storage
Denial of Service (DoS)	Flooding application with requests	Flask App	Rate limiting, traffic filtering
Elevation of Privilege	Unauthorized access to APIs/functions	Device API	RBAC (Role-Based Access Control), proper authorization
